SAUMYA

Software Engineer | MERN Stack | React.js • Node.js • REST APIs • Scalable Web Platforms
Noida, India | Linkedin | m.saumya@outlook.com | +91-9517222274 | GitHub

PROFESSIONAL SUMMARY

Full–Stack Software Engineer with 1.7+ years of experience building scalable MERN stack web applications using React.js, Node.js, and PostgreSQL. Experienced in designing RESTful APIs, real–time systems using WebSockets, and modular enterprise platforms including HRMS and monitoring dashboards. Skilled in database design, authentication (JWT), CI/CD automation, and deploying production systems for multi–user environments.

Proven ability to deliver production-ready systems with real-world deployment and multi-user scalability.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python

Frontend: React.js, Tailwind CSS, Bootstrap, Responsive UI Development

Backend: Node.js, Express.js, Django, RESTful API Development

Databases: PostgreSQL, MySQL, MongoDB, Supabase

DevOps & Cloud: Git, GitHub Actions, CI/CD, Docker (Basics), Render Deployment

Automation & Scraping: Selenium, BeautifulSoup

Core Concepts: Authentication (JWT), Role–Based Access Control, WebSockets, Database Design, API Security, System Architecture

WORK EXPERIENCES

Software Engineer | Genicminds Tech Pvt. Ltd.
(IT Services Subsidiary of Salgem Infoigy Tech Pvt. Ltd.)
Apr 2025 – Present

- Architected modular enterprise applications serving 30+ users, reducing manual effort and improving workflow efficiency across operations.
- Engineered 25+ secure REST endpoints with Node.js and JWT, enabling secure, scalable access across services.
- Delivered a production-grade HRMS platform used for role-based workforce management and secure internal operations.
- Orchestrated automated data pipelines using Selenium and BeautifulSoup for reliable structured extraction.

Software Developer Intern | Salgem Infoigy Tech Pvt. Ltd.
Sept 2024 – Mar 2025

- Implemented a real-time device monitoring system using WebSockets to handle live IoT telemetry streams.
- Established secure backend services with JWT and streamlined CI/CD pipelines via GitHub Actions on Render.
- Crafted responsive dashboards for real-time analytics and performance visualization.

LIVE PROJECTS

Production-grade systems deployed and actively serving real users in live environments.

https://gengindia.com/

- Engineered and deployed a business website with optimized performance and SEO-friendly structure.
- Reduced load time and improved cross-device responsiveness.
- Implemented scalable React-based frontend architecture.

https://kbmc.gov.in/

- Delivered a government website with structured data presentation and high availability.
- Ensured accessibility standards and stable performance under public usage.
- Optimized UI for clarity, responsiveness, and usability across devices.

OTHER PROJECTS

Inventory Management Automation (Python, CSV, CLI/GUI) 2024 – 2025

- Built an inventory system with stock tracking, automated reordering, and role-based access control.
- Integrated CSV reporting and web scraping for supplier and product validation.
- Structured normalized schemas for efficient inventory and supplier data management.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering 2020 – 2024
Ambalika Institute of Management and Technology | 7.52 CGPA

ACHIEVEMENTS

- CodeChef Silver (250+ problems) and consistent LeetCode practice.
- Sports Captain – 2× Runner–up at AKTU Zonal Sports Fest (Basketball).
- 1st Prize – Tech Innovation Competition.
