

SAUMYA

Software Engineer · Full Stack Developer · MERN Stack · REST API & Backend Systems
Noida, India | Open to Relocation | m.saumya@outlook.com | +91-9517222274 | www.linkedin.com/in/msaumya27
github.com/s-vashistha | s-vashistha.github.io/PORTFOLIO

PROFESSIONAL SUMMARY

Software Engineer with ~2 years of experience building and deploying scalable full stack applications, REST APIs, and real-time backend systems using React.js, Node.js, Express.js, and PostgreSQL. Delivered live production systems for enterprise and public-sector clients. Skilled in WebSockets, JWT authentication, RBAC, CI/CD pipelines, and Agile environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python

Frontend: React.js, Next.js, Three.js, Tailwind CSS, Leaflet.js, Recharts, Vite

Backend: Node.js, Express.js, Socket.io, REST API Development, API Architecture, Microservices

Databases: PostgreSQL, MongoDB, MySQL

DevOps & Cloud: Git, GitHub Actions, CI/CD Pipelines, Docker, Render, Vercel

Core Concepts: JWT Authentication, RBAC, WebSockets, REST APIs, Agile/Scrum, Scalable System Design, API Security

WORK EXPERIENCE

Software Engineer (Intern → Full-Time)

Sept 2024 – Present

Genicminds Tech Pvt. Ltd. · Noida, India

- Architected and deployed gengindia.com and kbmc.gov.in — fully dynamic production web applications with a custom RBAC admin dashboard, serving enterprise and public-sector users with 99% uptime.
- Built and secured 25+ REST APIs using Node.js and Express.js, reducing average response time by ~30% and improving API reliability across production systems.
- Engineered a production-grade HRMS platform with RBAC and JWT authentication, supporting 30+ active users and reducing manual administrative effort by ~40%.
- Integrated real-time data systems using WebSockets (Socket.io), reducing data latency from seconds to sub-second updates (~80% faster).
- Implemented CI/CD pipelines using GitHub Actions in an Agile workflow, reducing deployment time by ~50% and enabling faster release cycles.

PROJECTS

Real-Time Disaster Response Platform s-vashistha.github.io/disaster-response-platform 2026

Node.js · React.js · WebSockets · Socket.io · JWT · RBAC · PostgreSQL · REST APIs · Leaflet.js

- Designed a full stack real-time incident tracking system supporting 20+ concurrent users with live WebSocket updates and event-driven alerts.
- Implemented secure REST API architecture with JWT authentication and RBAC across multiple user types.
- Integrated geospatial data visualisation using Leaflet.js for location-based monitoring, improving response planning efficiency by ~25%.

Multi-Tenant SaaS Platform multi-tenant-saa-s-platform-seven.vercel.app | [GitHub](https://github.com) 2026

Node.js · Express.js · React.js · PostgreSQL · RBAC · JWT · Multi-tenancy · Render

- Architected a multi-tenant SaaS platform supporting 3+ organisations with schema-level PostgreSQL isolation and RBAC.
- Built tenant-aware REST API routing with Node.js and Express.js on Render, improving API request handling efficiency by ~30%.
- Designed role-driven React.js dashboards improving workflow efficiency and user management for 30+ active users.

Inventory Management Dashboard s-vashistha.github.io/inventory-management 2025

React.js · Vite · Tailwind CSS · Recharts · React Router · CSV Import/Export

- Developed a responsive inventory management app with role-based access, supplier management, inventory tracking, and ledger-based transaction workflows.
- Built analytics dashboards with stock valuation, category-wise visualisations, low-stock alerts, and automated reorder recommendations.
- Implemented CSV export for inventory, transactions, and business reports with persistent local storage and full CRUD operations.

EDUCATION

B.Tech — Computer Science & Engineering

2020 – 2024

Ambalika Institute of Management and Technology (AKTU) · CGPA: 7.52

ACHIEVEMENTS

- Solved 250+ DSA problems on LeetCode and CodeChef, demonstrating strong command of data structures and algorithms.
- Gold Medallist — Young Scientist Innovation Competition.
