Sector-75, Noida

EDUCATION

Bachelors of Technology in CSE
Ambalika Institute of management and Technology | **CGPA: 7.52** **2020-2024**

TECHNICAL SKILLS

1. **Programming Language**
   - C++
   - JavaScript (ES6+)
   - Python
2. **Frontend**
   - React.js
   - Tailwind CSS
   - Bootstrap
3. **Backend**
   - Node.js, Express
   - PHP
4. **Database**
   - MySQL, PostgreSQL
   - Supabase
5. **Cloud & DevOps**
   - GitHub Actions
   - Docker (Basics)
6. **BI & Dashboards**
   - Chart.js, React Table
   - Supabase Studio
7. **Other**
   - REST API
   - Data Modelling

ACHIEVEMENTS & ACTIVITIES

1. **CodeChef Silver Badge**
   Solved 250+ problems
2. **LeetCode Daily Streak Badge**
   Consistently solving DSA in C++
3. **1st Prize Winner**
   Young Scientist & Innovation
4. **Sports Committee Captain**
   Led the college sports committee managing events & teams
5. **Team Sports Achievements**
   Secured 2× Runner-up positions at AKTU Zonal Sports Fest in basketball.

CODING PROFILES

- **GitHub** : /s-vashistha
- **CodeChef** : /msaumya
- **Leetcode** : /m_saumya

WORK EXPERIENCES

1. **Software Engineer** **Apr 2025 – Present**
   Genicminds Tech Pvt. Ltd. - Salgem
   1. Built and maintained full-stack e-commerce platforms for B2B/B2C ecosystems, integrating payment gateways, shopping carts, and admin modules.
   2. Engineered secure, modular REST APIs and implemented Git branching strategies to enhance scalability, maintainability, and multi-dev collaboration.
   3. Developed role-based dashboards for government-sector clients, enabling granular access control and cross-department data visibility.
   4. Built a Python-based web scraping tool to collect and process data from multiple websites, fulfilling an e-learning client's content requirements.
   5. Designed and deployed an internal ERP system, including HRMS and administrative workflows.
2. **Software Developer Intern** **Sept 2024 – Mar 2025**
   Salgem Infoigy Tech Pvt. Ltd.
   1. Built a full-stack live device-health monitoring app using WebSockets, React.js, Node.js, and PostgreSQL; connected to simulated IoT devices to track performance and implement predictive failure analysis.
   2. Deployed on Render with CI/CD via GitHub, integrating JWT-secured APIs and responsive dashboards for real-time data visualization.
3. **Python Programming - Intern** **Jul 2023 – Aug 2023**
   CODSOFT
   1. Developed Python-based applications focusing on automation, secure data handling, and interactive interfaces.
   2. Applied modular programming practices and algorithmic logic to deliver maintainable, user-centric solutions.
4. **Full-Stack Developer - Intern** **May 2021 – Jun 2021**
   BEST2LEARN EDUCOM PVT. LTD
   1. Engineered a PHP backend for real-time content rendering, enhancing user engagement.
   2. Created frontend using HTML, CSS, JS, PHP, and Bootstrap.

PROJECTS

REVOLUTIONIZE INDIAN ELECTIONS — Present

Prototyped a secure voting system simulation incorporating biometric validation, real-time dashboards, and AI-driven fraud detection, modelled ATM-style accessibility and identity verification for high-volume polling zones, and demonstrated through predictive data analysis a simulated 25% boost in voter turnout along with a 30% reduction in wait times.

INVENTORY MANAGEMENT AUTOMATION — 2024-2025

Developed a CLI/GUI-based inventory management system with features for stock tracking, search, and automated reorder alerts. Implemented role-based access and CSV report generation.
